Andrea and Christopher Matovich

CRESCENT POINT ENERGY CORP.

APPLICATION NO. 933009

STATEMENT OF CONCERN NO. 31416

Dear Andrea Matovich and Christopher Matovich:

You are receiving this letter because you filed a statement of concern about Application No. 933009. The Alberta Energy Regulator (AER) has reviewed your statement of concern, along with the company's application, and all applicable requirements and other submissions or information about the application. The AER has decided that a hearing is not required to consider the concerns outlined in your statement of concern.

In its review of your concerns, the AER considered the following:

- Your concerns regarding traffic and road use are outside of the AER's jurisdiction and should be directed to the province or the local municipality, as applicable.
- Your concerns regarding the impact on wildlife and the environment are general in nature. They do not identify a specific location on or near the project that may be affected by the proposed pipeline.
- Your concerns regarding the property value decrease are general in nature and you have not demonstrated how your property value might be negatively affected be the proposed project.
- Your concern regarding flaring does not apply to the pipeline subject-matter of this application since there will be no flaring associated with the pipeline.
- Your concern regarding safety and the risk of emergencies has been addressed by Crescent Point Energy Corp.'s site-specific Emergency Response Plan in place for this pipeline. The company is also required to comply with the AER's *Directive 071: Emergency Preparedness and Response Requirements for the Petroleum Industry*.
- Crescent Point has addressed your concern regarding the necessity for two gas plants by utilizing existing infrastructure, which avoided the need to construct a new gas battery. This application is only for approval of the pipeline.

Based on the above, the AER considers that the objections raised in your statement of concern have been adequately addressed. The AER has concluded that it is not necessary to hold a hearing before making a decision on the application. The AER has issued the applied-for licence and this letter is providing you with notice of that decision. A copy of the licence is attached.

All AER-regulated parties must comply not only with the conditions of their authorizations, but with all of the AER's regulatory requirements. To ensure industry compliance the AER has developed its *Integrated Compliance Assurance Framework*, which embodies the three main components of all effective compliance assurance programs, those being education, prevention, and enforcement. You can find out more about how the AER verifies industry compliance and responds to noncompliance here: https://aer.ca/regulating-development/compliance/compliance-assurance-program.

You may file a regulatory appeal on the AER's decision to issue the licence if you meet the criteria within section 36 of the *Responsible Energy Development Act*. Filing instructions and forms are on our website under Regulatory Appeal Process.

If you have any questions, contact Nicole Nicholas at 403-297-4886 or Nicole.Nicholas@aer.ca.

Sincerely,

<O*riginally Signed By*>

Rob Cruickshank
