CRESCENT POINT ENERGY

APPLICATION NO. 933009

STATEMENT OF CONCERN NO. 31411

Dear Shanna Dunne and Brian Dunne:

You are receiving this letter because you filed a statement of concern about Application No. 933009. The Alberta Energy Regulator (AER) has reviewed your statement of concern, along with the company's application, and all applicable requirements and other submissions or information about the application. The AER has decided that a hearing is not required to consider the concerns outlined in your statement of concern.

In its review of your concerns, the AER considered the following:

- Crescent Point has addressed your concern regarding new facilities by utilizing existing infrastructure, which avoided the construction of a new gas battery.
- You concerns regarding any potential future battery applications are out of the scope of the current application.
- You do not have any interests in the property on which the proposed pipeline will be situated.
- Your concern regarding land value decrease is general in nature and you have not demonstrated how your property value will be negatively affected by the proposed project.
- Compensation based concerns are outside of the AER's jurisdiction.

Based on the above, the AER considers that the objections raised in your statement of concern have been adequately addressed. The AER has concluded that it is not necessary to hold a hearing before making a decision on the application. The AER has issued the

applied-for licence and this letter is providing you with notice of that decision. A copy of the licence is attached.

All AER-regulated parties must comply not only with the conditions of their authorizations, but with all of the AER's regulatory requirements. To ensure industry compliance the AER has developed its *Integrated Compliance Assurance Framework*, which embodies the three main components of all effective compliance assurance programs, those being education, prevention, and enforcement. You can find out more about how the AER verifies industry compliance and responds to noncompliance here: https://aer.ca/regulating-development/compliance/compliance-assurance-program.

You may file a regulatory appeal on the AER's decision to issue the licence if you meet the criteria within section 36 of the *Responsible Energy Development Act*. Filing instructions and forms are on our website under Regulatory Appeal Process.

If you have any questions, contact Nicole Nicholas at 403-297-4886 or nicole.nicholas@aer.ca.

Sincerely,

<O*riginally Signed By*>
