June 26, 2017

Implementation of OneStop for Pipelines Licence Applications

We have implemented a new online process for new pipeline construction applications under the *Pipeline Act* using the OneStop platform. All new pipeline construction applications of the following types must be submitted using OneStop:

- construction of a new pipeline or pipeline installation requiring a new licence number,
- construction of a new pipeline or pipeline installation being added to an existing licence number,
- licensing of an unlicensed pipeline or a pipeline installation requiring a new licence number, or
- licensing of an unlicensed pipeline or a pipeline installation being added to an existing licence number.

We have also released quick reference guides that explain how to use OneStop to submit new pipeline construction applications. These guides are issued under section 6 of *Directive 056*. The information requirements for pipeline licence applications under section 6 have not changed. However, new pipeline construction applications must now be submitted using [OneStop \(available on the AER website under the Systems & Tools Portal\)](#). The quick reference guides are available [on the AER website under the Systems & Tools Portal > OneStop: User and Quick Reference Guides](#).

For more information, please visit [the Integrated Decision Approach webpage](#), send an email to inquiries@er.ca, or call the Customer Contact Centre at 1-855-297-8311.
