

# Bulletin 2020-04

March 11, 2020

## Revisions to the Digital Data Submission System

We have updated the Digital Data Submission system. Effective immediately, operators are able to submit diagnostic fracture injection test (DFIT) results and pressure volume temperature (PVT) studies in their TRG PAS files. The updated PAS file specifications can be found at <http://www.aer.ca/documents/dds/PASFileFormats.pdf>.

For questions regarding well test submissions, contact the well test helpline at [WellTest-Helpline@aer.ca](mailto:WellTest-Helpline@aer.ca).
