

# Bulletin 2020-13

June 19, 2020

## OneStop Enhancements and Fixes

On June 25 we will release enhancements and fixes to the OneStop platform. To implement these changes, OneStop will not be available from 8:00 a.m. Wednesday, June 24 to 8:00 a.m. Thursday, June 25. This outage notice will be posted on our Systems and Tools portal on our website, [www.aer.ca](http://www.aer.ca).

Industry will be able to request to withdraw any undecided applications currently in OneStop as well as provide reasons for the withdrawal. Two new Tableau reports will also become available within OneStop: “Disposition Expiry and Renewal Eligibility” and “Disposition Cancellation.”

Additional details will be available next month in the “What’s New” document, found on the OneStop landing page under “Enhancements and Fixes”.

New and amended quick reference guides (QRGs) will also be posted on the OneStop landing page next month. These support public lands applications, submissions, notifications, and import of spatial data.

If you have any questions about this bulletin, contact the Customer Contact Centre by phone at 1-855-297-8311 or email at [inquiries@aer.ca](mailto:inquiries@aer.ca).
