Ivan Schlaht

**CANADIAN NATURAL RESOURCES LIMITED
APPLICATION NO. 1675423
STATEMENT OF CONCERN NO. 31624
LOCATION: 100/11-09-021-02W4/02**

Dear Ivan Schlaht:

You are receiving this letter because you filed a statement of concern about Reclamation Certificate Application No. 1675423. The Alberta Energy Regulator (AER) has reviewed your statement of concern, along with the company's application, and all applicable requirements and other submissions or information about the application. The AER has decided that a hearing is not required to consider the concerns outlined in your statement of concern.

In our review of your concerns, we considered the following:

- The results of Phase 2 Environmental Site Assessment (ESA) conducted in July 2017, are consistent with the *Alberta Tier 1 Soil and Groundwater Remediation Guidelines – ABT1G* (ESRD, 2014).
- The Detailed Site Assessment (DSA) completed on August 13, 2019, shows that all soil, landscape, and vegetation parameters of the *2010 Reclamation Criteria for Wellsites and Associated Facilities for Cultivated Lands* (Reclamation Criteria) were met. The DSA indicated that all of the parameters are comparable both onsite and offsite.
- During the site visit conducted on April 22, 2020, with the AER's Reclamation Assessor in your presence, you indicated that you do not have any outstanding concerns about the 100/11-09-21-02W4M/02 reclamation site.
- The Reclamation Criteria are applied to evaluate whether "a site has met equivalent land capability." Given the findings made in the DSA and during the AER site visit, the AER is satisfied that the site has met equivalent land capability and that your concerns have been addressed.

Based on the above, the AER has concluded that it is not necessary to hold a hearing before making a decision on the application. The AER has issued the applied-for Reclamation Certificate, and this is your notice of that decision. A copy of the Reclamation Certificate is attached.

All AER-regulated parties must comply not only with the conditions of their authorizations but with all of the AER's regulatory requirements. To ensure industry compliance, the AER has developed its *Integrated Compliance Assurance Framework*, which embodies the three main components of all effective compliance assurance programs, those being education, prevention, and enforcement. You can find out more about how the AER verifies industry compliance and responds to noncompliance here: <https://aer.ca/regulating-development/compliance/compliance-assurance-program>.

You may file a regulatory appeal on the AER's decision to issue the Reclamation Certificate if you meet the criteria within section 36 of the *Responsible Energy Development Act*. Filing instructions and forms are on the AER website under Regulatory Appeal Process.

If you have any questions, please contact SOC@aer.ca.

Sincerely,
