**Logan Sears**  
**Mancal Energy Ltd. (Mancal)**  
**Infrastructure Application No. 1858958**  
**Statement of Concern No. 30356**

Dear Mr. Sears:

On November 1, 2016, the Alberta Energy Regulator (AER), in accordance with *section 26(2)(b) of the Oil and Gas Conservation Act*, provided Mancal with notice and the opportunity to comment on the AER's intention to amend Licence F49096 with proposed conditions.

The AER received Mancal's response via email dated November 14, 2016, in which it did not raise concerns with the proposal and stating that "at the 07-15-35-22 W4M Wellsite Mancal will keep the existing Genset with sound attenuation onsite". Based on Mancal's response the AER will close the Application No. 1858958. A copy of the closure document is attached.

The AER will proceed to amend the Facility Licence No. 49096 with the following condition;

*"Mancal will utilize the existing Genset with sound attenuation equipment at their 07-15-035-22 W4M site. "*

If you have any questions, please contact Judith Zatzek at 403-297-6932 or email [Judith.zatzek@aer.ca](mailto:Judith.zatzek@aer.ca) .

Sincerely,
