Mark LaBoucane

CANADIAN NATURAL RESOURCES LIMITED (CNRL)

APPLICATION NO. 1918784

STATEMENT OF CONCERN NO. 31463

Dear Mark LaBoucane:

You are receiving this letter because you filed a statement of concern about Application No. 1918784. The Alberta Energy Regulator (AER) has reviewed your statement of concern, along with the company's application, and all applicable requirements and other submissions or information about the applications. The AER has decided that a hearing is not required to consider the concerns outlined in your statement of concern.

In our review of your concerns, we considered the following:

- The subject application is for an amendment to CNRL's Primary Recovery Scheme Approval No. 9415, to allow CNRL to increase the subsurface well density in the proposed project locations from the standard prescribed in the *Oil and Gas Conservation Rules*. The amendment would not authorize any drilling or surface activities. Your concerns pertain to drilling and surface activities and are, therefore, outside the scope of this application.
- Specifically, your concerns regarding well location, noise, and odours are all outside the scope of the current application. These concerns can be raised and considered when CNRL files its *Directive 056: Energy Development Applications and Scheduled* (D056) application.
- Your concerns regarding traffic are outside the jurisdiction of the AER and should be directed to the appropriate authority (Alberta Transportation or the municipality).

- Your concerns regarding quality of life are general in nature. You have not demonstrated how approval of the proposed application may directly and adversely affect your quality of life.

Based on the above, the AER has concluded that it is not necessary to hold a hearing before making a decision on the application. The AER has issued the applied-for approval and this is your notice of that decision. A copy of the approval is attached.

All AER- regulated parties must comply not only with the conditions of their authorizations, but with all of the AER's regulatory requirements. To ensure industry compliance the AER has developed its *Integrated Compliance Assurance Framework*, which embodies the three main components of all effective compliance assurance programs, those being education, prevention, and enforcement. You can find out more about how the AER verifies industry compliance and responds to noncompliance here: <https://aer.ca/regulating-development/compliance/compliance-assurance-program>.

You may file a regulatory appeal on the AER's decision to issue the approval if you meet the criteria within section 36 of the *Responsible Energy Development Act*. Filing instructions and forms are on our website under Regulatory Appeal Process.

If you have any questions, contact Megan Carfantan at Megan.Carfantan@aer.ca.

Sincerely,

<Original Signed By>

Lane Peterson
