Don & Helen Kosinski

Statement of Concern No. 33065
Spur Petroleum Ltd. (Spur Petroleum)
Application No. 33840773
Location 00/02-19-047-15W4M

Dear Don & Helen Kosinski,

You are receiving this letter because you filed a statement of concern (SOC) about Application No. 33840773. The Alberta Energy Regulator (AER) has reviewed your SOC, along with the Application, and all applicable requirements and other submissions or information about the Application. The AER has decided that a hearing is not required to consider the concerns outlined in your SOC.

In our review of your concerns, we considered the following:

- AER staff have confirmed that your concerns related to reclamation of the access road are unrelated to the subject Application and relate to a matter beyond the scope of the Application. The AER encourages you to discuss outstanding concerns with the party responsible for the access road (the Orphan Well Association (OWA)). Should your concerns remain unaddressed, you may submit an SOC when the reclamation certificate application for the OWA site and access road is submitted.
- A Detailed Site Assessment (DSA) was conducted in August 2025. The DSA showed that the conditions of the landscape, soil and vegetation parameters for the well site and access road were comparable both on-site and off-site and met the *2010 Reclamation Criteria for Wellsites and Associated Facilities for Cultivated Lands*.

Based on the above, the AER has concluded that it is not necessary to hold a hearing before making a decision on the Application. The AER has issued the applied-for reclamation certificate, and this is your notice of that decision. A copy of the reclamation certificate is attached.

All AER-regulated parties must comply not only with the conditions of their authorizations, but with all of the AER's regulatory requirements. To ensure industry compliance the AER has developed its Integrated

Compliance Assurance Framework, which embodies the three main components of all effective compliance assurance programs, those being education, prevention, and enforcement. You can find out more about how the AER verifies industry compliance and responds to noncompliance here: https://aer.ca/regulating-development/compliance/compliance-assurance-program.

You may file a regulatory appeal on the AER's decision to issue the reclamation certificate if you meet the criteria within section 36 of the Responsible Energy Development Act. Filing instructions and forms are located here: https://www.aer.ca/regulating-development/project-application/regulatory-appeal-process.

If you have any questions, please contact SOC@aer.ca.

Regards,
