Statement of Concern No. 33066
Rubellite Energy Inc. (Rubellite)
Application No. 33887264
Location: 16-07-061-17W4M

Dear Mike Holowaychuk,

You are receiving this letter because you filed a statement of concern (SOC) about Application No. 33887264. The Alberta Energy Regulator (AER) has reviewed your SOC, along with the Application, and all applicable requirements and other submissions or information about the Application. The AER has decided that a hearing is not required to consider the concerns outlined in your SOC.

In our review of your concerns, we considered the following:

- A Detailed Site Assessment (DSA) was conducted on June 21, 2024, for the landscape, soil and vegetation. The DSA showed that the conditions of the landscape, soil and vegetation were comparable both on and offsite. The DSA indicated that all parameters of the *2010 Reclamation criteria for Wellsite's and Associated Facilities for Cultivated Lands* (Reclamation Criteria) were met.

- As discussed with an AER Reclamation Assessor at a site visit on August 18, 2026, operators retain a 25-year liability for surface reclamation issues (topography, vegetation, soil texture, drainage, etc.) and a lifetime liability for contamination, following the issuance of an AER Reclamation Certificate. Landowners may submit concerns/complaints at any time during this period by contacting an AER field center or recremquestions@aer.ca.

Based on the above, the AER has concluded that it is not necessary to hold a hearing before making a decision on the Application. The AER has issued the applied-for Reclamation Certificate, and this is your notice of that decision. A copy of the Reclamation Certificate is enclosed.

All AER-regulated parties must comply not only with the conditions of their authorizations, but with all of the AER's regulatory requirements. To ensure industry compliance the AER has developed its Integrated Compliance Assurance Framework, which embodies the three main components of all effective compliance

assurance programs, those being education, prevention, and enforcement. You can find out more about how the AER verifies industry compliance and responds to noncompliance here: https://aer.ca/regulating-development/compliance/compliance-assurance-program.

You may file a regulatory appeal on the AER's decision to issue the Reclamation Certificate if you meet the criteria within section 36 of the Responsible Energy Development Act. Filing instructions and forms are located here: https://www.aer.ca/regulating-development/project-application/regulatory-appeal-process.

If you have any questions, please contact SOC@aer.ca.

Regards,
