Ackroyd LLP

ENBRIDGE PIPELINES (ATHABASCA) INC

APPLICATION NOS. 432511, 920092, 921099, 921107, 921111

STATEMENT OF CONCERN NO. 31473

Dear Ms. Thompson:

You are receiving this letter because you filed a statement of concern about Application Nos. 432511, 920092, 921099, 921107, 921111. The Alberta Energy Regulator (AER) has reviewed your statement of concern, along with the company's application, and all applicable requirements and other submissions or information about the application(s). The AER has decided that a hearing is not required to consider the concerns outlined in your statement of concern.

In our review of your concerns, we considered the following:

- The concerns regarding destruction of habitat and Indigenous plant species, noise, traffic, increased risk of interference with traditional resources, and impacts to the integrity of the environment have been addressed to the AER's satisfaction through mitigation procedures by Enbridge.
- The concerns regarding the impacts to the exercise of Treaty Rights have been adequately addressed because Enbridge is willing to make arrangements during construction and operations to accommodate requests, provided safety considerations are fulfilled.
- Enbridge is required to meet all environmental and regulatory guidelines and requirements.

Based on the above, the AER has concluded that it is not necessary to hold a hearing before making a decision on the application(s). The AER has issued the applied-for license and this is your notice of that decision. A copy of the license is attached.

All AER- regulated parties must comply not only with the conditions of their authorizations, but with all of the AER's regulatory requirements. To ensure industry compliance the AER has developed its *Integrated Compliance Assurance Framework*, which embodies the three main components of all effective compliance assurance programs, those being education, prevention, and enforcement. You can find out more about how the AER verifies industry compliance and responds to noncompliance here: <https://aer.ca/regulating-development/compliance/compliance-assurance-program>.

You may file a regulatory appeal on the AER's decision to issue the license if you meet the criteria within section 36 of the *Responsible Energy Development Act*. Filing instructions and forms are on our website under Regulatory Appeal Process.

If you have any questions, contact Silken Leach at 403-355-4032 or silken.leach@aer.ca.

Sincerely,

<original signed by>
