

Reclamation Certification Application Declaration Form

This declaration must be signed by the operator (consultant signatures are NOT acceptable).

I, _____ of _____
declare the following:

This application was prepared and completed under my direction. To the best of my knowledge, the application is true, accurate, and complete.

- We contacted the landowner/occupant and inquired about any outstanding concerns with the site and documented their response in the application.
- We conducted a detailed site assessment and all requirements described in the appropriate reclamation certification criteria have been met.
- We have attached a copy of the Notification of Drilling Waste Disposal form or equivalent and, if required, either or both of the following: the appropriate drilling waste compliance option checklist and the Phase 2 environmental site assessment (ESA) that includes sampling of drilling waste disposal areas.
- We carried out a Phase 1 or a Phase 2 ESA, or both (copies attached).
- An up-to-date Record of Site Condition has been submitted with the Phase 2 ESA.
- We identified and remediated all contamination resulting from the use of this site to meet Alberta Environment and Park's requirements, and there are no chemical or physical conditions that resulted from our use of this land that may adversely affect the soil, vegetation, or groundwater on or off the site described in this application package.
- We included the listing of people who performed the reclamation and remediation assessments and their professional designation, if any. For any work completed after January 1, 2008, we included the Professional Declaration Form, completed and signed by the professional members who conducted or supervised the work.
- I confirm that no existing sites or linear features, whether held by us or another party, have been left without access or left dead-ending. Action has been taken to resolve any potential access or dead-ending issues prior to submission of this application.
- We understand that incomplete applications will not be accepted and we will have to reapply once the missing information has been added.

I am aware that providing false or misleading information to the AER may result in enforcement action. For example, it is an offence under section 227 of the *Environmental Protection and Enhancement Act* to provide false or misleading information, and under section 228 of the act, significant fines or imprisonment is possible.

Note: Electronically signing the form has the same force as wet signing the document.
